

Section 4 - Ornithopod Eggs

This section features a collection of dinosaur eggs and nests of eggs from China. Visitors can touch a real fossilized dinosaur leg bone that was found on a private ranch in South Dakota, USA.

Displays, images and interactives in this section include:

- Ornithopod Eggs Section Panel 4 (see CD)
- Doubts about Duckbills E&D Panel 4 (see CD)
- Framed artwork (at right and below)
- Assortment of Ornithopod eggs & nests from China
- Real dinosaur leg bone (touch) (see below)
- Dig pit for kids to discover ornithopod eggs

Artwork above "Dawn at the Rookery" by Mark Hallett showing *Hypacrosaurus* family values. Photo below by Louie Psihoyos of Exterra Dinosaur Workshop with mounted *Hypacrosaurus* in the center.
